

Subject: Urgent Appeal for Action on Food Security in Sudan

Dear Esteemed Members of the EU, France, and Germany International Humanitarian Conference Committee,

We extend our sincere gratitude for your attention to the humanitarian situation in Sudan. We write urgently to address the critical issue of food security in our country on behalf of the Sudan Agriculture and Food Security Platform. As an organization committed to enhancing agricultural productivity and ensuring sustainable food security, we are deeply troubled by the challenges currently facing Sudan's agricultural sector.

Recent agricultural seasons have been fraught with formidable obstacles, exacerbated by ongoing conflicts and inadequate preparatory measures. Loss of arable land, financial constraints, and disruptions in the agricultural supply chain have led to a decline in production, posing a grave threat to food security nationwide.

Given the gravity of these challenges, we implore the conference committee to prioritize discussions and initiatives aimed at alleviating Sudan's food security crisis. Urgent action is imperative to cease hostilities, deliver humanitarian aid, provide financial and technical support to farmers, and ensure the success of agricultural endeavors through input provision and harvest facilitation.

We appeal to the EU, France, and Germany International Humanitarian to recognize the urgent necessity for international aid and sustained investment to bolster sustainable agricultural development in Sudan. By collaborating on the implementation of requisite measures and policies, we can enhance food security and fulfill the essential dietary requirements of the Sudanese populace.

Thank you profoundly for your unwavering attention to this pressing matter.
